

LABORATOR

Creati sau deschideti obaza de date si apelati editorul VBA (Visual Basic) prin obiectul modules→new. Apoi deschideti fereastra **Immediate** prin meniul **View→Immediate window**. Comanda ? va permite afisarea efectului functiei.

Incercati functiile si expresiile urmatoare:

?Dateadd("d",10,date())	Time()+"*"
Date() - #24/01/1952#	Len("albatros")
Dateadd("m",3,date())	Format(1.5,"000.000")
Dateadd("yyyy",2,date())	Format(1234.5,"00")
Datediff("m", date, "2/2/2004")	Format(#6/25/97#,"yyyy mmm")
Month(date())	Format(1.5895,"#.00")
Datediff("yyyy",date, "2/2/2004")	Val("012")
Year(date()) – 1990	Str(123.45)
Day(date()) + 2	Format(#6/25/97#,"mmm")
Iif(month(date())=1,"ianuarie","eroare")	Format(1.5,"##")
Now()	
#24/01/1952# + date()	
Isdate(#12/12/2000#)	
Trim("albatros")	
Format(1.5, "00")	
Mid("alba ca zapada",1,4)	
Left("alba ca zapada",4)	
Right("alba ca zapada",4)	
Format(#6/25/97#,"mmm","", "dd")	
Format(123.45,"(999)-999.999")
